Rouen, October 2002

FIBREGUM™: THE MOST SUITABLE FIBRE FOR FIBRE-ENRICHED BEVERAGES

FIBREGUM™ is a soluble dietary fibre from Acacia gum. It is one of the very few dietary fibres fulfilling both nutritional and technological requirements.

FIBREGUM™ doesn't show side - effects usually obtained with low molecular - weight fibres. Its technological compatibility is important because of its absence of taste and odor. Furthermore,

FIBREGUM™ is the only soluble dietary fibre, which presents such intrinsic low viscosity.

Finally, its unrivalled resistance in acidic conditions, even at high temperatures, allows to get in the finished product the same level of fibre as initially added.

All these characteristics are essential for the preparation of a fibre - enriched drink.

This is confirmed by the recent beverages launched on the French market.

CNI - We add nothing to nature but innovation.™
